Traditionally, schools give more importance to \_\_\_\_\_ than to \_\_\_\_\_. In my opinion, this makes students to \_\_\_\_\_ instead of\_\_\_\_\_.

It is clear that \_\_\_\_\_ can be unfair because it might result in \_\_\_\_\_ and therefore they would have fewer opportunities to \_\_\_\_\_

In addition, if \_\_\_\_\_ many teachers could \_\_\_\_\_. Consequently, \_\_\_\_\_.

In conclusion, it seems to me that \_\_\_\_\_ because \_\_\_\_\_. What's more, I believe that too much importance is given to this matter.
