ADVANTAGES AND DISADVANTAGES

Can technology make your life easier?

Many people think that using the latest technology is useful **because** it allows you to do a lot of things without effort; however, it has some disadvantages.

On the one hand, technology can be helpful when travelling, communicating, shopping, studying and receiving medical care.

On the other hand, using too much technology **can be risky**. People use the mobile phone or the Internet all the time and this can keep them in a state of anxiety. **You also have to be careful with** the money you spend on technology **because** it can cost lots of money.

Finally, in my opinion using technology **will make your life easier** as long as you don't go too far.
